

From now on, your smartphone is the key

Embrace the future
with Incedo™ Business Mobile Keys

ASSA ABLOY
Opening Solutions

Experience a safer
and more open world

The world is moving - physical access the smart way

Incedo moves with you, today and in the future

Using keys, cards or fobs as a method of access control has always been an operational burden for those who had to manage them, they are time consuming to control and ensure everyone has relevant access.

For employees, key cards are cumbersome to carry, many leave them on their desks, putting company security at risk or at home putting further strain on those having to issue temporary ones to cover the employees forgetfulness.

A growing number of buildings are now integrating touchless access control systems to create safer, cleaner environments after the recent COVID pandemic.

Three benefits of Incedo Business Mobile Keys

- 1 User convenience and efficiency
- 2 Secure mobile access
- 3 Simplified management

Mobile is today's go-to technology for convenience and portability — and is a logical step for enhancing access control in buildings.

What are Mobile keys?

Mobile keys can be used on mobile phones, tablets, watches and other wearable electronic devices, they allow the device to function as a user's credentials to enter an office or other business facilities.

They are convenient to use and can be instantly issued, changed or revoked over the air.

Smart devices can add another layer of protection with its biometric authentication and screen locking.

Your 1st benefit:

User convenience and efficiency

Update credentials faster

Less contact with surfaces

- **No more waiting**

For temporary staff or visitors, there's no more queuing at reception or visiting a card collection point, 'keys' are sent over the air

- **Simple**

Using a mobile phone for access means users no longer have to remember to bring their key or card

- **New experiences**

Improved versatility with either a 'tap' or 'twist' gesture to open doors

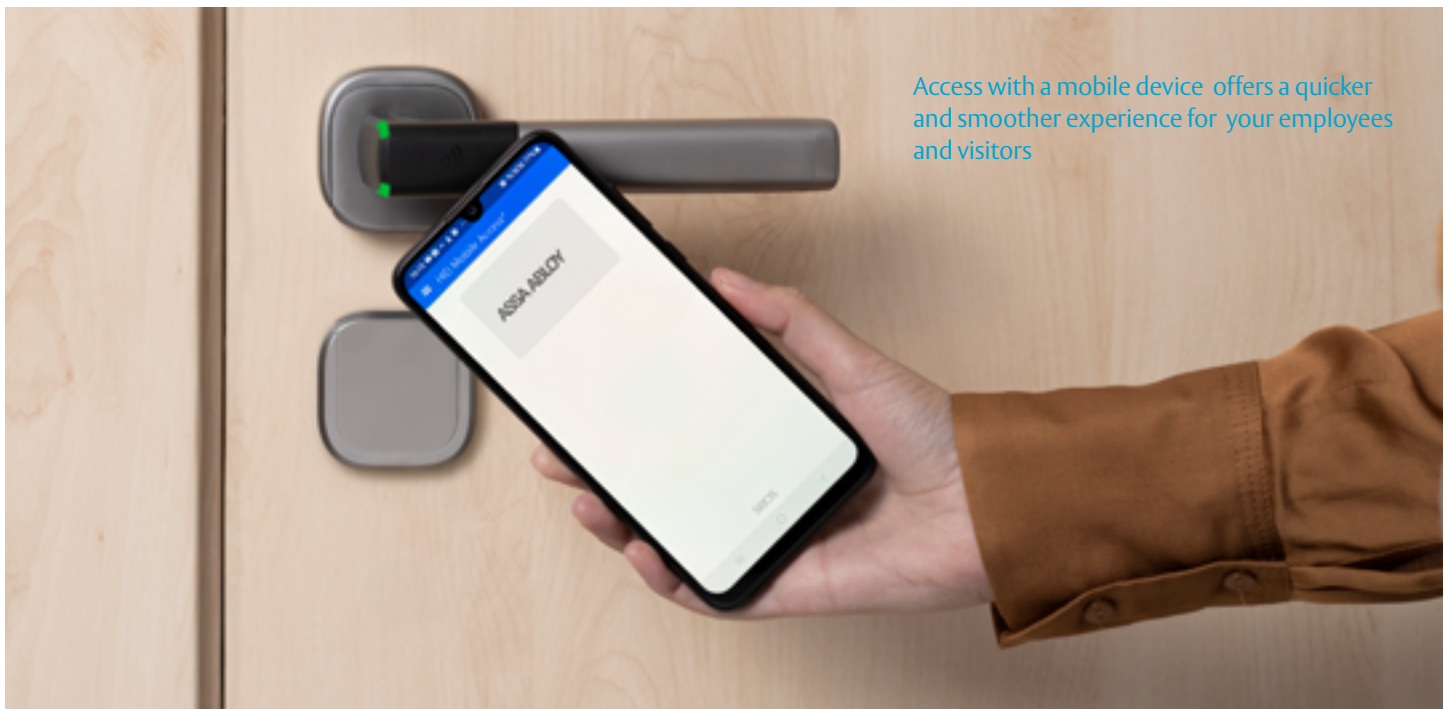

- **Reduce touchpoints**

Personal mobile credentials replace shared plastic cards and face to face handovers keeping everyone safer

- **Reduce use of plastic materials**

No more one time use plastic cards to print or fobs to enroll and no more travelling to hand out key-cards

With Incedo Business you can offer all in one experience - Users can open many access points with their mobile phone

Your 2nd benefit: Secure mobile access

Enhanced building security

- **Extra protection**
Add another layer of protection with the mobile devices' biometrics and screen locking
- **No more sharing**
Many breaches are done when cards are shared, mobile phones are far more personal

- **Enhance security**
When using a mobile key the transmission range is greater, so readers can be placed behind a locked door

Devices add ID security

Additional features of ASSA ABLOY mobile access solution:

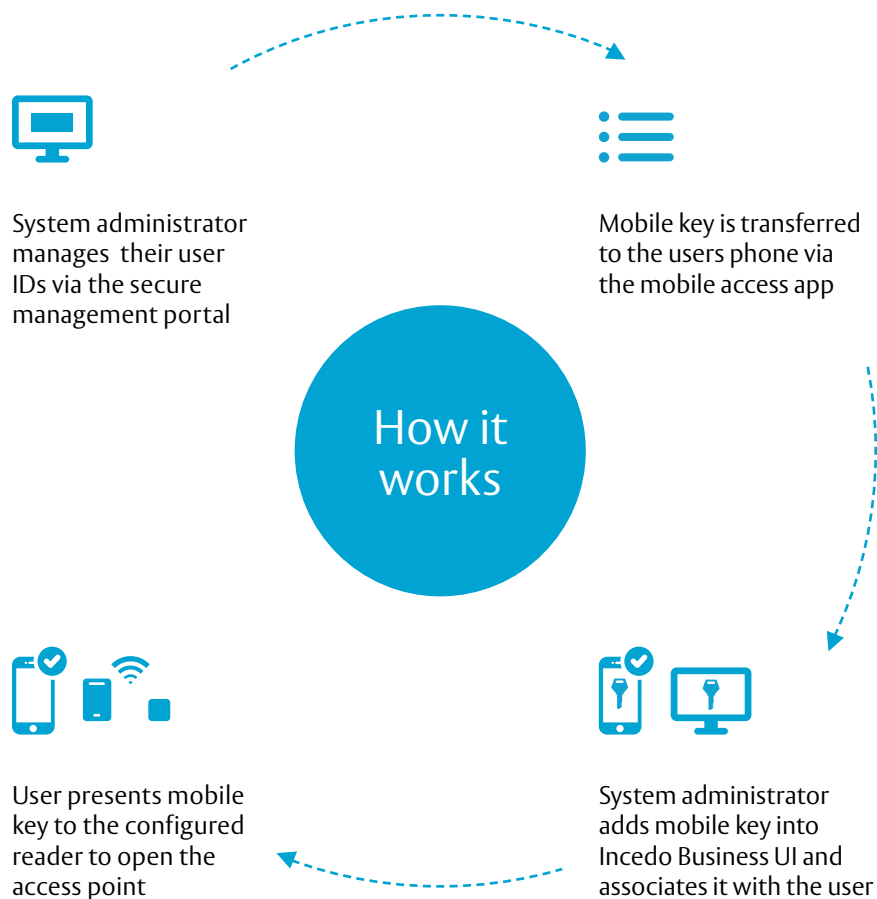

- Powered by Seos™ delivering a very high level of security and privacy protection
- Our market leadership in trusted identities ensures all data is secure
- AES 128 bit encryption to protect data, all keys are received using SSL.
- All users are enrolled via a secure online management portal

Take real-time control, issue or revoke mobile credentials immediately over the air

Your 3rd benefit: Simplified management

**Sending, receiving and using a mobile key
is much easier than you think!**

The online management portal has many benefits including:

User friendly interface for administrator

Simple enrolment via an intuitive app

Unique transactions to ensure privacy

Easily managed user access rights

High security and round-the-clock control

Many ASSA ABLOY Incedo 13.56Mhz readers are smartphone ready and can be updated with minimal interruption

Incedo Business offers the flexibility to scale your system up and down anytime

At low cost and with minimum effort

Incedo delivers the integration and connectivity your business demands, providing secure access points and advanced identification technology. It makes life easier and work more efficient for everyone.

Incedo Business works for any building, leaving you free to focus on growing your business. It makes sure your employees, customers and goods are where they need to be.

Incedo Business provides a user-friendly interface for managing your access control platform. You have a choice of system management options — Lite, Plus or Cloud — to administer Incedo-enabled hardware in a way that best suits your business' needs.

You simply choose the security hardware you require with the credentials you need and then you can switch between Lite, Plus and Cloud system management whenever you choose. With Incedo, maximum flexibility is guaranteed — today and in the future.

Easy administration of user rights
with Incedo Business Cloud management system

Apply hardware that fits your needs, add more as your site expands

Incedo Business offers a growing range of hardware - from ASSA ABLOY or 3rd parties - that you can choose from for your buildings' security. Once installed, simply issue mobile keys as a credential via the online management portal, so your employees can open all the necessary access points in your building with their mobile phones.

Controllers

The heart of your installation connects readers, wireless door locks and other devices to the central Incedo system. The controllers keep everything and everyone moving with maximum efficiency.

Programmers

Keep everyone's credentials up to date with a range of convenient programmers and updaters. With the correct access rights, everyone keeps moving easily and securely.

Readers

Choose from a variety of Incedo-enabled wired and battery-powered readers. You can mix and match readers to meet the exact requirements of your business and building.

Credentials

Our range of convenient credentials have intelligence and security built-in. Cards and tokens offer broad RFID compatibility and the mobile keys enable users to open doors with their smartphone.

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.
